York Ledger, releas at some length on the your file supericture in Erie It is generally known in that Mr. Greeley finished his apprenticeship at the printing business in the pilics of the Erie Gracite. Of the measure of his coining, and the impressions created by his sojourn there, he easy having aire dy exhusted the possibilities in the printing line of Chautauqua county, I now wished Frie, Pr., where I found work in the office of the Erie Grazette, and was retained at \$15 per month well into the ensuing summer.

This was the first newspaper whereout was employed that made any money for its owner, and thus had a pecuniary value. It had been started twenty years or so before, when borough and county were both thinly peopled, almost wholly by poor, young men, and it had grown with the victuage until it had a substantial, profitable patronage. Its proprictor, Mr. Joseph M. Sterret, now in the prime of hito, had begun with lie as boy, and grown up with a hito general consideration and exteem, his journeyment and epocation of the constraints of the form of the first and I spent here, two months industriously and agreeably. Though still a raw youth of twenty takes in a first of it. I make a main and the print of its invite months in the force who I thus entered it I made acquaintances there who are still valued incomes, and, before lieft, I was offered a partnership in the concern, which, though I in discussions for declaining, was none the less illutering as a more of uppreciation and couldence. Mr. Sterrete has since represented his District acceptibly in the Senar of Peningsia varie and received other proofs of the trustful right of his fellow citizens, and, though he has refined from the Ga atta shift fives in the culoy in the other proofs of the culoy.

The New York trassets and the Evening Mail have reached into law. We Sweetzer, the former publisher of the Jurning travette which he sold or \$10,000, is charged by Mr S J Aburn with having procured its purtures by making false representations, he having, as alteged, stated that its circulation was 2,900 when it did not exceed 1300, and that as the time of saleit was free, from debt, whereas, a large bill for paper yet romains unpid, that Mr Ahern, on purchasing Mr; liwester's paper, imagined that he had also bought its good will, fixtures in dappurtunaneas, whereas Ewectser, as is alleged, on the day after the sale was effected, published a paper called the Evening Mail, and is it stated orditorially, that it was the Evening Gezette in a new dress, and obtained advertisements from Mr Ahern's personal friends on the representation that the Graette had nearly changed its name. Sweetser also carried away with him the offices, printers, clerks and material, leaving, it is charged nothing but the name of the paper, which, Mr Ahern thinks, is not by any means, worth \$10 000. Mr Sweetser a story, when it comes to be heard, may put a different phase upon the matter.

Ballooning,

An English paper says it is in contemplation to hold an exhibition about the month of May 1808, of machinery and apparatus relating to mronautics. It is known there are several expenaive designs for srial transit now under con struction, and it is thought desirable to offer sub sinnial prizes for the lightest motive power cap able, in the opinion of the council of the British Aeronautical Society, of best effecting or assist ing carrying out the science of serial pavigation expected that as this is comparatively new and now pressing requirement, some nove ty will be presented for exhibition. The objects would probably be classified as follows: 1. Light angines and machinery. 2. Complete working zerial apparatus. 3. Models. 4. Ditto-working 5. Plane and Illustrative drawings. 6. Separat acticles connected with properties, including obof previous experiments. 7. Kites or other similar apparatus proposed to be used in cases of cape and landscape as seen from a ballo To ensure the success of this exhibition it is without replenishing its gas, at any time during the days of reception allowed for articles of ex-hibition

Imperital Buffrege.

The question of Impartial Suffrage, which was ed to the voters of Ohlo on Tuesday last, is presented by striking out the first section of a flith article of the present Constitution, which

"Every white male citizen of the United States of the age of 21 years, who shall have been a resident of the State one year next preceding the election, and of the country, towardship, or ward in which he resides such time as may be provided by law, shall have the qualification of a voter, and be entitled to vote at all elections."

And substituting therefor the following: And substituting therefor the following:

"Every male citizen of the United States of the age of 21 years, who shall have been a resident of the State on the age of 21 years, who shall have been a resident of the State one year next preceding the election, and of the county's township, or ward in which he resides such time as may be provided by law, except such pursons as have borne arms in support of any insurrection or rebellion against the Government of the United States, or havined from their places of residence to avoid being drafted into the military service thereof, or have descreted the military or havin services of said Government in time of war, and had not subsequently been honorably discharged from the same, shall have the qualifications of milited to vote at all elections."

Othlo voted "NO." on Tuesday last to this

Ohio voted "No" on Tuesday last to this Amendment. She is opposed to Shavery. She held it as an anti-Christian, anti-Republican system. But having sout out many of her sous to the war to save the Union which Slavery had rent saunder, having put her hand to the plow, she now holds back. But let us be Just to her. To the honor of the Republican party, let it be said, probably five-sixths or ninetenths of its members voted for this grand meas are of simple justice.

But a few thousands tast their ballots against it. It is not every one who calls himself a Republican, who can be relied on, who is really a ustice and liberty foring man, just as it is not every one who wears a military uniform or shoulders a musket who is a true soldier. But et us congratulate ourselves that so many, that two hundred thousand were found in the great State of Ohio, who could elevate themselves above prejudice, and do an act of simple justice, onsistent with their professions.

After abolishing the form of slavery at the

South, do the Northern States intend to therish and perpetuate us spirit? Do they propose to establish and tolerate a caste, in their midst, and draw invidious distinctions between one class and another of its citizens? Eather the colored men must be slaves or cutzens. If free, it cit; zens, then the Government has no more right to withhold the ballot from them, than it has to selve and appropriate their enrings, the fruits of their industry. Freedom is an empty hoon, mockery, nuless it is protected by pointenl rights among which is the elective franchize

But while conceding the abstract justice of

their claim to the suffrage, many men affirm tha it is a dangerous concession, that we are going to e ruled by negroes, if we give them the billot

What a highest to frighten fools with! Take the State of Ohio for example In 1860 the male white population of that State was a little less than one million, two hundred thousand, while the male colored population searcely exceeded eighteen thousand. With such a dispurity as this, how idle and preposterous to talk of the blacks getting the upper hand? And this dis-crepancy is being increased your by you not only by the natural law of increase, but immigration, thus swelling the preponderance of the whites. The whites too have the wealth, the education, and all the elements of superiority on their side, So that after all this dening of the belief to the blacks, is nothing nore or less than in inscusate and wicked prilit dice and is founded on actifici justice, policy or m terest. Produce Moving East.

The receipts of produce at the lake ports are at present very heavy, reaching, at the ports of Chicago and Milwankee, in the neighborhood of million bushels of grain dally. The receipts of 2,608,082 bushels of grain, and 69,950 barrels of floor. There were affect on caunt, destined for tide-water, including shipment from Buildle for lourteen days auding 18th test at noon, and from Oswego for nine days ending 7th inst.-four, 5,414 bertels; wheat, 1,773,938 imsheis; corn, 664,311 do., oats, 945,648 do., barley, 580,448 do. and rye, 185,590 do. Activity in the forwarding business is creating a corresponding activity in the shipping business from New York, the shipments of grain to Europe within a week footing m more than a million bushels, principally wheat coustwest distribution. It is said that fully \$1,000,000 a day are needed to handle the receipts of grain in Chic sgo and neighboring cities. The Chicago banks float the crops a short distance take up the burden, and between the latter and ules in Europe it is carried to the other side of the A limite, the whole process forming an immense current of commerce. It is estimated York evers week throughout the retriender of the ecoson, and it is a gratifying fact that we have a bandsome surplus to spare England, France and other needy countries. Our exports of grain, cotton and other agricultural products, will ensble us to mucrially reduce, if not entirely liquidate, the present rather heavy foreign trade balance against us. THE work accomplished by the Pacific Rail road in crossing the Sierres is one of the marvels of the world in engineering skill. The road nakes a steady ascent for pinety miles from Sa amento to Cisco, its present terminus, where it eaches an aithtude of 5,911 feet; when it cross he summit it will be 7,912 feet above the level of the sea. During this ascent it crosses enormous tround the mountain-side, where you look down nto canons thousands of feet below, or through and gradually climb, by many a grade and curve grand peaks so high that the enow still lies on the minnits. Sometimes the track is cut in the solf rock, sometimes supported by huge piles of ins sonry; again penetrating in dark tunnels the rocky mountain side. Frequently for miles it is overed with snow-roots made of heavy timber before the road will be safe from avalanches and mow delfes. On these Alpine summils the snow piles and drifts forty feet deep. But when the road is fairly finished over the Sierros, it will give the grandest journey which can be taken on this continent. And far beyond the region which the ye can reach lies a country even yet more diffi it and inhospitable, where the real difficulties of the Pacific road are to communce—the fearfu wilderness and desert between the Sierras and aundred miles not a tree of timber or piece o ire wood can be obtained. THE FLOW OF CURRENCY TO THE WEST. Since the large receipts of grain at the Western lake ports, there has been a steady flow of curoney from New York to the West. Before the quire at least thirty millions of dollars to move he crop to the seaboard. This Western drain of Eastern currency of course makes money far less bondant in New York During the summer he Atlantic cities had nearly all the money i the country, but now it is fortunately flowing back to fertilize and quicken every branch of in-dustry. During the next six months the West will have its full share of the peedful fands to dart new enterprises and invigorate the old channels of trade. "

AN IMPORTANT CASE has been decided by the United States District Court of Northern Georgia, confirming the purchase of an estate for Confederate money. Dean sold his estate to Youett in 1864, for \$24,000 Confederate money, and efferward tried to annul the sale on account of he nature of the consideration, but failed Juden Ersking Chamtmed the bill and easteined the purchase. The Cincinnati Gazette says: This case has excited a great deal of interest, and is, perhaps the most important one to the Southern people decided since the close of the war.
